

Fletcher 2200™ Mat Cutting System

**We Took The Leader
And Made It Better.**

Throughout 2002 and 2003 Fletcher-Terry asked picture framers worldwide what they wanted in a straight-line mat cutter.

Our challenge: make the industry standard in straight-line mat cutters even better.

The end result: the brand new Fletcher 2200™ mat cutter.

It's the only mat cutter you need for sizing cuts, bevel cuts, and V-grooves...especially when precision and accuracy are high on your list of priorities.

New Features

- Additional holes on pin locator system - now up to 8" (203mm) wide border for faster repeat cutting
- Deeper cuts - now cut nominal foam-board up to 1/2" (13mm) thick (straight side)
- Straight side cutting magazine (patent pending); it's now easier to load and replace your blades - blades adhere magnetically
- Sight line gage - a guide that helps you start/stop on your mark, to minimize overcuts
- Instruction video - now includes mat cutting training by John Ranes, CPF, GCF

Ergonomic Design Improvements

- New textured oval mat clamp handle

- New bevel and straight side comfort grips with textured soft rubber coating
- New improved scales - now in yellow for increased visibility and accuracy
- New locking knobs for a more secure and comfortable grip

Additional Features

The 2200 mat cutter is made with a strong and straight anodized aluminum base that prevents warping and helps deliver many years of uninterrupted operation. Equally important, this newly improved tabletop mat cutter helps to eliminate human error through its unique "pin locator system", making it incredibly easy to set accurate borders and multiple mat exposures.

- Ball bearings glide the head along the hardened aluminum bar clamp

for greater cutting ease...this is a Fletcher-Terry exclusive patented feature

- Two large Delrin bushings fit the head snugly to the chrome plated steel shaft...eliminates head movement and hooked cuts
- Easy-to-use squaring blocks allow you to adjust the mat guide parallel to the clamp

Complete package includes:

- Instruction video (VHS or PAL format)
- Detailed owner's manual
- Two (2) year warranty
- Ten (10) blades for bevel cutting
- Ten (10) blades for straight cutting

2200 MAT CUTTING SYSTEM

Specifications:	40" 2200	48" 2200	60" 2200
Height	3.81" (97mm)	3.81" (97mm)	3.81" (97mm)
Depth	20.67" (525mm)	20.67" (525mm)	20.67" (525mm)
Cutting Capacity	40" (1016mm)	48" (1219mm)	60" (1524mm)
Max. Material Thickness	1/2" (13mm)	1/2" (13mm)	1/2" (13mm)
Weight	45 lbs. (20kg)	47 lbs. (21kg)	58 lbs. (26kg)
Length	50.65" (1287mm)	58.68" (1490mm)	71.03" (1804mm)
Table Space	7.27 sq. ft. (.68sqm)	8.42 sq. ft. (.78sqm)	10.20 sq. ft. (.95sqm)

Improve performance, versatility and productivity with these precision-engineered accessories.

Measuring Stops and Angle Mat Guide

Base Plate Extension

Squaring Arm

Clamp Lifters

Accessories

- Measuring stops save time while reducing overcuts and undercuts. Especially useful for cutting multiple mats - one set of stops per package
- Angle mat guide provides reliable cutting of angled mat openings from 15 - 75°
- Base plate extension

expands your work surface to cut wider mat borders [up to 17.5" (445mm)], multiple opening mats and title mats

- Right side squaring arm provides support for accurate sizing of large matboard sheets. Comes with one measuring stop
- Clamp lifters hold the mat

clamp off the base so you can use both hands to position the matboard

- Dust covers - one each for each size machine
